

# Easter Revision Course 2023

GCSE • IGCSE • A Level • IB

OXFORD  
SCIENCE  
STUDIES

# Key Information

## Course Dates

Bookings are available for 1, 2 or 3 weeks of study

Monday 27th to Friday 31st March

Monday 3rd to Friday 7th April

Monday 10th to Friday 14th April

## Course Fees

This course is offered on a day only or residential basis, located at one of our glorious Oxford locations, such as St Edward's School

£995 per week, day only

£1,395 per week, residential

## Course Options

Courses are tailor-made to fit individual needs, there is no requirement to focus only on the one subject for the duration of the week, in fact students may choose one to three subjects per week. The week consists of three teaching blocks, each lasting one and a half days.

## Course Elements

As revision specialists with more than 25 years of experience, we understand the need for a test and teach approach to studies. We therefore offer a combination of tutorials and exam practice. Our tutorials are small group, with a maximum of 6 students, enabling a friendly learning environment. We also include Study Skills.

“Simply put... I went from a D to an A... with only 3 sets of sessions...”  
Sam, Student

### Who is this course for?

This course is suitable for any student aged 14 to 19 years, focusing on their GCSE, IGCSE, A Level or IB studies. That includes those students in Years 11 and 13, with exams just around the corner, but also those in Years 10 and 12, not yet due to sit exams but keen to put themselves in the best possible position. It is ideal for students wanting to consolidate their subject understanding and maintain focus in a structured learning environment over the holidays.

### What subjects are available?

We offer most subjects at GCSE, IGCSE, A Level and IB. The most popular being Maths, Biology, Chemistry, Physics, English Literature, English Language and History. Exceptions generally include those of a more practical application, such as Design & Technology, PE, Art, Theatre Studies or Food Technology.

“She said that this was one of her best holiday weeks. The teaching she said was just simply amazing, on another level. I can’t thank you guys enough, not only did she enjoy and understand chemistry but she felt that she was part of a unique group of students all with the same purpose.”

Parent, Easter 2022

### Small Groups

Courses are intensive, with a structured timetable and environment, geared towards concentrated study and away from distractions. Our approach is based on the tutorial system employed by the universities of Oxford and Cambridge, involving small study groups, each with their own expert tutor.

### Exam Practice

Providing students with the opportunity to consolidate what they have learned and gain exam experience. Students are provided with sample exam questions and past papers to work through independently. Subject content, exam practice and technique are a fundamental element of the course.

## Pastoral care & wellbeing

Student wellbeing is of high importance and we ensure that all necessary safeguarding provisions are in place. Our office staff are available throughout the day to assist with any need, from academic to first aid. Our energetic Evening Entertainment Team ensure the evenings activities are a safe and enjoyable experience and our overnight wardens are close to hand at any hour.

## Time to unwind

After a long day of study, we appreciate the need for some time out. Although some students may wish to continue with independent studies in the evening, we do offer a Evening Entertainment Programme for all residential students. Recent offerings have included time with a renowned magician, a trip to the local golf driving range, debate nights, a scavenger hunt in Oxford and trip to the local cinema.

# Why Oxford Science Studies?

When exams are fast approaching and students reach the crunch point of the academic year, the final few months and weeks provide a unique opportunity for students to drill down on exam technique and refine subject knowledge, ensuring they achieve the grades they deserve. We appreciate that selecting the right revision provider is key. With over 25 years experience, we believe that our timetable incorporates the required elements to support students, providing expert guidance in an informal space to ask nagging questions, alongside the chance to really focus in on what the exams will be asking and how they will be expected to answer to get the top marks. We are also incredibly flexible and specific, timetabling around you. Class sizes are small and tailored to set course details, meaning students can get the specific help that they require. Also, this is what we do, all year round, our sole focus is on providing high quality revision courses.

# Frequently asked questions

How can I get the most out of it?

Carefully consider your subject options, are you choosing ones that you like (but are already good at) or ones that you need help with?

Be prepared! Courses are student led. Be sure to attend with a list of topics in mind that you would like to review. The more information you come armed with, the better the tutors can guide you and organise your time.

Speak up! The tutors are there to help YOU - not the other way around, they are already specialists in the subject. You are there to benefit from their expertise and tutorials are tailored around you. It is a chance to hone in on subject detail, ask questions, review subject knowledge and material.

Complete your exam practice! This is work set for you to complete independently. To gain familiarity of the exam setting, the type and style of questions that you will face, and the chance to review answers with your tutors to better understand exam strategy and technique.

Who are the tutors?

We have brought together a core of tutors, who we believe are the best in the business. All have undergone a rigorous recruitment process and have performance reviewed course on course. Some are full-time tutors at local schools and colleges, some private tutors and researchers from Oxford University, some examiners, and others Oxford graduates who know what it takes to achieve top grades. Many are currently, or have been, involved in academic research, which often enables them to bring extra insight and enthusiasm.
